The Economist features groundbreaking research on human breast milk and the story of HAMLET

Hamlet BioPharma is pleased to announce a recent article about human breast milk in *The Economist*, a leading international newspaper. The article highlights the pioneering work on HAMLET being conducted at Lund University, exploring the remarkable therapeutic properties of breast milk components in treating cancer and other diseases.

"This is important recognition of our findings and supports the relevance of our approach to developing novel cancer treatments." says Catharina Svanborg, Lund University and Hamlet BioPharma.

Read the article in The Economist here: <https://www.economist.com/science-and-technology/2024/09/11/breast-milks-benefits-are-not-limited-to-babies>. *An account is required to be able to read the full article*
