

## PRESS RELEASE

Lund, April 7<sup>th</sup>, 2025

### New granted patents added to Hamlet BioPharma's extensive patent portfolio in cancer and infection

*Hamlet BioPharma's extensive patent portfolio comprises 147 granted patents and 33 pending cases. Strategy regarding intellectual property rights, follow up and extension of filed cases and patenting of new discoveries is overseen by the internationally established legal firm Greaves-Brewster LLP, who have advised Hamlet BioPharma since the start.*

*We are delighted to announce the recent grant of three patents in the company's portfolio.*

1. The Hamlet Mixing Method patent (CN 110650746) was granted in China on December 31<sup>st</sup> 2024.

*This patent protects an improved method for the production of HAMLET complexes, especially Alpha1H for clinical trials.*

2. The Pol II inhibitors patent (IN 558357) was granted in India on January 21<sup>st</sup> 2025.

3. The Pol II inhibitors patent (AU 2017344453) was granted in Australia on March 6<sup>th</sup> 2025.

*The Pol II inhibitors patents protect the molecule NlpD, which has shown strong therapeutic effects against bacterial infections in animal models. This protein inhibits excessive inflammation and accelerates bacterial clearance.*
